

Florida VIP Statewide Assessment Policy

Students enrolled through their district using EdOptions Academy as their VIP provider are required to participate in State Testing in accordance with their grade level cohort.

EdOptions Academy will post the state testing schedule at the beginning of the school year and update students and parents as to the necessary tests that must be taken.

Upon review of the student's transcript, a notice will be provided to each student and parent as to the number and name of all tests the student must participate in during the school year. EdOptions Academy will work with district testing offices to secure the test site location for each student and communicate that location well in advance of the testing date.

Should the student fail to participate fully in the statewide assessment program, the student will immediately be removed from the EdOptions Academy VIP program.
